NOTES:

1. These figures represent formally scheduled time. They do not include, for instance, night hours spent in reading or writing.

2. In general, they represent student time rather than staff time. Thus, where the same seminar or exercise is given twice (once to Group I and once to Group II) it is counted only once.

3. An exception to point 2: In exercises where one student or a pair of students receive the exclusive attention of a staff observer, the time shown is that required to handle a major segment of the class (usually half the class). This means that the figures shown for Tradecraft are somewhat higher than the number of hours each individual student is involved.
